No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Glycinin chain A2Bla precursor - soybean
NyAlternate names: 11S globulin
NyAlternate names: 11S globulin
Cybrologies: 91ycinin chain Bla
Cybrologies: 31-Mar-1988 #sequence revision 31-Mar-1988 #text change 05-Oct-2004
Cybrologies: 31-Mar-1988 #sequence revision 31-Mar-1988 #text change 05-Oct-2004
Cybrologies: Nogoro, T.; Udaka, K.; Fukazawa, C.
Fixmana, T.; Nogoro, T.; Udaka, K.; Fukazawa, C.
FBBS Lett. 188, 117-122, 1985
A;Title: A complete cDNA coding for the sequence of glycinin A2Bla subunit precursor.
A;Reference number: A91341

A;Accession: A91341
A;Molecule type: mRNA
A;Residues: 1-485 <mONA
A;Cross-references: UNIPROT:P04405; UNIPARC:UPI000016DD98
A;Experimental source: strain Bonmimori
A;Note: the source of this mRNA was cotyledon tissue taken from seeds at the middle st B;Marco, Y.A.; Thanh, V.H.; Tumer, N.E.; Scallon, B.J.; Nielsen, N.C.
J. Biol. Chem. 259, 13436-13441, 1984
A;Title: Cloning and structural analysis of DNA encoding an A2B1a subunit of glycinin.
A;Reference number: A92454; MUID:85030472; PMID:6092376

"mRNA of soybean proglycinin AlaBlb subunit.";
Submitted (JUN-2003) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Glycinin is the major seed storage protein of soybean.
-!- SUBUNIT: Hexamer; each subunit is composed of an acidic and a basic chain derived from a single precursor and linked by a disulfide bond.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     (globulins)
